TAGactive® Dual Cyber Towers are timed web maze climb towers. The designs feature two separate towers side by side with start, mid and end beacons.

Game instructions, previous and best scores are displayed on the large TV screen for each tower. The TAGactive® Cyber Towers associate all players scoring history with their account via their RFID wristband. Players receive split and total times for their attempts. A large TV scoreboard displays the tower best times and all the times from the days use. Cyber towers are fully automated and do not require constant staffing. Age = 8+

- Footprint Available**

# AERIAL ASSAULT

## WHAT IS A TAGactive® AERIAL ASSAULT WALL

Aerial Assault wall is a gamified obstacle wall system with a foam pit fall area. The wall has numerous dynamic obstacles to climb on or over in order to reach the illuminated beacons and score points via player RFID wristbands. The wall is time limited and permits numerous players on the wall at one time.

## HOW DOES IT WORK - AERIAL ASSAULT WALL

The wall is constantly live, permitting players to self register at the start computer screen.

The screen will display a players and the walls best scores and count them into their start (we stagger players start times for safety).

When directed a player can start their attempt.
